# Projects contributing to the vision of EDL Foundation

- **PrestoPRIME** - European launch – Paris, April 2009. Its goal is to research and develop practical solutions for the long-term preservation of digital media objects, programs and collections, and find ways to increase access by integrating the media archives of audiovisual documents with European on-line digital libraries in a digital preservation framework.
- **Video Active** presents television material from audiovisual archives across Europe. It provides resources to explore how cultural and historical events have been televised within and across nations and gives a unique perspective on European television history.

- **APEnet** (Archives Portal Europe) is a Best Practice Network project supported by the European Commission in the eContentplus program and its objective is to build an Internet Gateway for Documents and Archives in Europe where twelve European National Archives in close cooperation with the Europeana initiative will create a common access point to European archival descriptions and digital collections.
- **TrebleCLEF** Coordination Action intends to move in the direction by building on and extending the results already achieved by CLEF (Cross-Language Evaluation Forum). The objective is to support the development and consolidation of expertise in the multidisciplinary research area of multilingual information access and to promote a dissemination action in the relevant application communities.

- **ATHENA** will bring together relevant stakeholders and content owners from museums and other cultural institutions all over Europe and evaluate and integrate specific tools, based on a common agreed set of standards and guidelines to create harmonised access to their content. ATHENA will contribute in the content provision to Europeana.
- **IMPACT** is a project funded by the European Commission. It aims to significantly improve access to historical text and to take away the barriers that stand in the way of the mass digitisation of the European cultural heritage

- **EFG** - The European Film Gateway is a 3-year project which started on 1st September 2008. It will develop an online portal, providing direct access to about 790,000 digital objects including films, photos, posters, drawings, sound material and text documents
- **STERNA** Project has produced a Technology Watch report- its function is to provide STERNA and other projects related to the European Digital Library with a "radar" that identifies initiatives in content/metadata enrichment and integration of heterogeneous digital collections based on Semantic Web languages and technologies

- **The European Library** is a free service that offers access to the resources of the 48 national libraries of Europe in 32 languages. Resources can be both digital or bibliographical (books, posters, maps, sound recordings, videos, etc.). Currently The European Library gives access to 150 million entries across Europe. The amount of referenced digital collections is constantly increasing. Quality and reliability are guaranteed by the 48 collaborating national libraries of Europe. The European Library is a non-commercial organization.
- **EuropeanaLocal** is a Best Practice Network project, funded under the eContentplus program of the European Commission, which started on 1 June 2008. It is designed to involve and help local and regional libraries, museums, archives and audio-visual archives to include digital collections in Europeana.

### La Mesopotamia d'Italia rivive nel nuovo Museo Archeologico di Adria

Ci sono voluti sette anni di lavoro e ingenti investimenti per riorganizzare il cospicuo patrimonio artistico conservato all'interno del Museo Nazionale Archeologico di Adria, in provincia di Rovigo. Nella struttura oltre sessantamila reperti narrano la storia del Polesine dall'Età del Ferro all'epoca Romana. L'integrazione fra lo spazio e il tempo è il filo conduttore che lega le varie sezioni di visita, corredate da documenti cartografici, e collega la storia dell'area in un contesto più ampio che va dalle vicissitudini della penisola italiana alla cultura dell'intera area mediterranea. Realizzato su progetto scientifico di Simonetta Bonomi e Loretta Zega, entrambe della Soprintendenza di Padova, il nuovo museo è stato realizzato col contributo della Soprintendenza per i Beni Archeologici del Veneto e i fondi del Gioco del Lotto, di Arcus S.p.A. e della Fondazione Cassa di Risparmio di Padova e Rovigo. Dei circa sessantamila reperti di proprietà del Museo solo una parte ha finalmente trovato collocazione nella nuova struttura. L'opera ha richiesto sia la ristrutturazione del vecchio stabile che il suo ampliamento. La prima fase dei lavori si è svolta dal 2002 al 2004; a seguire i...
